

## Fishing gear?

Nets, trawls,  
pots, seines,  
dredges, lines,  
traps...

Made from **synthetic fibers** (derived from oil).  
Fishing gear is mainly made of plastic, but can  
also be made of metal, wood...

### Nylon (PA)

Used for gillnets and fishing lines.  
Appreciated for its flexibility and  
elasticity.

### Polyethylene (PE)

Used for trawls because of its  
resistance to abrasion and  
breakage.

### Polypropylene (PP)

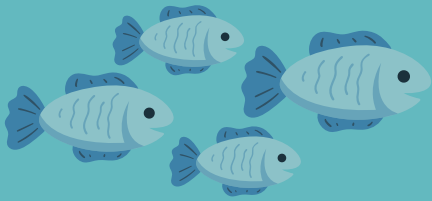

Light and floatable, it is commonly  
used for ropes.

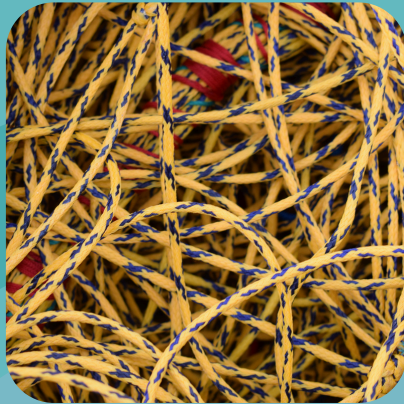

### Polyester

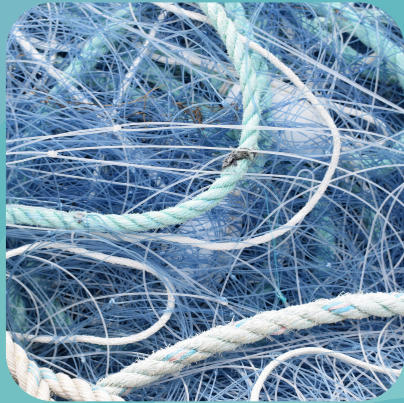

Known for its durability and UV  
resistance, it is used in various  
types of nets.

## TRAWL NETS

## FINE NETS

## ROPES & FISHING TRAPS
